

CHEMISTRY - CHEMISTRY OR GEOCHEMISTRY BA/BS

The Chemistry program prepares students for industrial or government laboratory work or graduate work in Chemistry or Biochemistry. The Chemistry emphasis provides a strong foundation for students entering the professional health fields, especially the pre-professional programs such as Pre-Medical, Pre-Dental, Pharmacy and Medical Technology.

The Geochemistry emphasis couples a solid foundation in analytical chemistry with the deductive thinking skills, three-dimensional visualization skills, and fundamental understanding of earth materials that the earth sciences offer. Students graduating with this major are prepared for careers in the geo-technical industry as well as continuing their education in a graduate program in the Environmental Earth Sciences.

Students may also complete courses required for secondary teaching certification.

Upon completion of the program, students will be **well-prepared** to:

- Understand the relationship between matter and energy, composition and structure, and and their relation to physical and chemical behavior
- Apply chemical principles to biological, geological and environmental phenomena
- Demonstrate quantitative and conceptual reasoning
- Think critically and apply knowledge in novel contexts
- Safely and effectively apply laboratory skills
- Design, conduct and report scientific research within the discipline
